

Slope of Linear Functions from Tables

Jonathan R. Bacolod

For a linear function, the slope remains **constant** throughout the table.

Slope Formula

The slope can be found using

$$m = \frac{\text{change in } y}{\text{change in } x} = \frac{y_2 - y_1}{x_2 - x_1}.$$

Finding the Slope

To determine the slope from a table, select any two points and compute m .

Linear Relationship

If the computed slopes between different pairs of points are equal, the relationship is **linear**.

Examples

Example 1

Find the slope of the linear function represented by the table.

x	0	1	2	3
y	2	5	8	11

Example 2

Find the slope of the linear function represented by the table.

x	1	3	5	7
y	4	8	12	16

Example 3

Find the slope of the linear function represented by the table.

x	-1	0	1	2
y	7	5	3	1

Practice Exercises

Practice 1

Find the slope of the linear function represented by the table.

x	0	1	2	3
y	2	5	8	11

Practice 2

Find the slope of the linear function represented by the table.

x	1	3	5	7
y	4	8	12	16

Practice 3

Find the slope of the linear function represented by the table.

x	-1	0	1	2
y	7	5	3	1

Practice 4

Find the slope of the linear function represented by the table.

x	0	2	4	6
y	-1	3	7	11

Practice 5

Find the slope of the linear function represented by the table.

x	2	4	6	8
y	10	9	8	7

Practice 6

Find the slope of the linear function represented by the table.

x	-2	0	2	4
y	1	5	9	13

Practice 7

Find the slope of the linear function represented by the table.

x	1	2	3	4
y	-3	-1	1	3

Practice 8

Find the slope of the linear function represented by the table.

x	0	5	10	15
y	12	7	2	-3

Practice 9

Find the slope of the linear function represented by the table.

x	-3	-1	1	3
y	2	6	10	14

Practice 10

Find the slope of the linear function represented by the table.

x	4	6	8	10
y	-2	-2	-2	-2

Activities

Activity 1

Determine the slope of the linear function represented by the table.

x	0	1	2	3
y	4	8	12	16

Activity 2

Determine the slope of the linear function represented by the table.

x	2	4	6	8
y	3	7	11	15

Activity 3

Determine the slope of the linear function represented by the table.

x	-2	-1	0	1
y	9	6	3	0

Activity 4

Determine the slope of the linear function represented by the table.

x	1	3	5	7
y	0	6	12	18

Activity 5

Determine the slope of the linear function represented by the table.

x	1	3	5	7
y	14	12	10	8

Activity 6

Determine the slope of the linear function represented by the table.

x	-4	-2	0	2
y	-3	1	5	9

Activity 7

Determine the slope of the linear function represented by the table.

x	2	3	4	5
y	-5	-2	1	4

Activity 8

Determine the slope of the linear function represented by the table.

x	0	4	8	12
y	15	11	7	3

Activity 9

Determine the slope of the linear function represented by the table.

x	-4	-2	0	2
y	1	7	13	19

Activity 10

Determine the slope of the linear function represented by the table.

x	5	7	9	11
y	6	6	6	6

Thank you!
